

ENTERO FLORA PRO

An innovative multi-strain probiotic supplement for cats and dogs

FEATURE/FUNCTION:

Eight strains of live probiotic bacteria in concentrated form (10 billion CFU/gram):

- *Lactobacillus acidophilus*
- *Lactobacillus plantarum*
- *Lactobacillus rhamnosus*
- *Bifidobacterium bifidum*
- *Lactobacillus bulgaricus*
- *Lactobacillus reuteri*
- *Lactobacillus casei*
- *Bifidobacterium longum*

» BENEFIT:

Multi-strain probiotic powder with 10 billion CFU/serving with strains carefully selected to help restore the beneficial microbiota in dogs and cats for superior gastrointestinal and immune system support in both the large and small intestine.

FEATURE/FUNCTION:

Odorless, tasteless, powder probiotic with no animal proteins and an 18-month shelf life.

» BENEFIT:

Great for allergies and sensitive diets. Single formula for both canine and feline means minimal inventory. Flavorless powder that is extremely easy to administer with no palatability concerns.

FEATURE/FUNCTION:

Contains 200mg of FOS (Fructooligosaccharides) prebiotic fiber.

» BENEFIT:

Prebiotic soluble fiber (FOS) stimulates the growth of beneficial bacteria, supports nutrient digestion, and maintains normal balance and regularity.

Research shows that fructooligosaccharide supplementation supports healthy gut microbiota composition in dogs and cats. FOS is well known to promote fecal bulk and normal transit time in pets and in senior cats, and modulates stool odor-forming compounds.

CHECK-OFF & ECHO NOTES

Check-Off (Qualify)

Identify if the customer currently recommends any probiotics and any in the VetriScience GI Health Lineup, like FAST BALANCE PRO, GI BALANCE PRO, ENTERO HEALTH PRO, or ENTERO FLORA PRO:

Doctor, do you use any probiotics currently?

If **YES**, confirm and discuss benefits

If **NO**, explain that probiotics support digestive tract health, regularity, a healthy immune system, and microbial balance with the proper array of probiotic strains.

Probiotics are great for use during or after administration of antibiotics, useful after dietary indiscretions, addressing food sensitivities, and dealing with stress-induced GI distress. They can also assist with healthy weaning of puppies and kittens.

Confidence

I believe that ENTERO FLORA PRO is a great probiotic to use with your patients.

ENTERO FLORA PRO is an innovative multi strain probiotic supplement for dogs and cats containing 10 billion CFU's per serving of beneficial bacteria carefully selected to provide superior intestinal and immune support for animal companions.

This highly concentrated blend of 8 live beneficial bacteria along with the prebiotic FOS fiber offers a powerful supplement for pets. This convenient, easy to use, flavorless powder is very cost-effective and is part of the VetriScience vet-exclusive ProLine.
