SHARING EXPERTISE

# IntroVet®

## The Super Sharp Catheter

| FEATURES: | BENEFITS: |
|---|---|
| Universal Back Cut Bevel Needle | Wide choice of insertion angles help access difficult veins. Creates minimal trauma, decreased risk of infection, and greater comfort for patient. |
| Bevel Indicator | Identifies position and direction of needle for one-handed catheter advancement. |
| Double Flashback Technology | Immediately shows a successful venipuncture. First stick success eliminates need to reinsert needle or 'flushing for checking.' |
| Removable Flash Plug | Permits attachment of a syringe for aspiration or other specialized procedures. |

# Venous Access IV Catheters

CP Medical, in collaboration with B.Braun, offers a complete portfolio of IV Catheters for all your venous access needs. We offer Ported Catheters (perfect for cytotoxic medications), Non-ported Catheters, and Safety Catheters. All catheters are available in Teflon (FEP), or softer polyurethane (PUR) material for more comfortable, and longer performance.

CHECK-OFF & ECHO NOTES

First, always ask if a CP Medical representative has visited the practice recently:

Doctor, have you recently been introduced to an IV catheter that is easy to place and offers a longer indwelling time?

If **YES**, confirm and discuss benefits.
If **NO**, engage/detail the customer as the primary contact.

### CONFIDENCE

I believe IntroVet® will provide an important tool for managing first stick success and reduce workload, stress, and time for you and your team!

### INVITATION (neutral)

Let's take a new perspective about venous access and the solutions that B.Braun's IntroVet® catheters can provide.

### CUSTOMER'S DECISION

…so you can see that IntroVet® offers solutions to consider for all your patients presenting with various needs for intravenous access.
