Amilextin™ features two clinically proven ingredients, AmLexin® and Anivestin™ that may help relieve inflammation and ease discomfort from daily activity. It’s recommended for dogs suffering from acute discomfort, progressive joint conditions and limping or mobility issues.

- AmLexin® is a potent antioxidant blend that may help relieve joint inflammation, and protect cartilage from breaking down.1 AmLexin® consists of a proprietary combination of Acacia catechu heartwood extract and Morus alba root bark extract, powerful antioxidants that may help reduce degradation of joint cartilage.

- Anivestin™ is a plant-based formula clinically proven to help relieve inflammation, reduce joint stiffness and improve mobility.2 Anivestin™ contains a proprietary bioflavonoid mixture derived from two botanicals, Scutellaria baicalensis and Acacia catechu with a long history of use without harmful side effects.
