

SutureSeal™
Seal. Protect. Heal.

SutureSeal is the only hydrogel wound sealant that offers up to 14 days of protection with each application for all non-food animals including:

- > Small animals
- > Exotics
- > Aquatics
- > Avian
- > Reptiles
- > Equine

SutureSeal is colorless, odorless, flexible, transparent, non-irritating and designed to enhance the healing process for open or closed wounds on sutures, staples, burns, abrasions, mass removals, lick granulomas and hot spots.

SutureSeal is water resistant, lick and chew resistant bandage replacement made of a non-toxic biodegradable hydrogel.

Wound Sealant

HYDROGEL WOUND SEALANT

Key Feature #1:

The only hydrogel wound sealant that offers up to 14 days of protection with each application for all non-food animals including: Dogs & Cats, Exotics, Aquatics, Avian, Reptiles and Equine.

Its Benefit:

The convenience of having 1 product for the use across a variety of different species and wounds without the worry of being in compliance.

Key Feature #2:

The choice of having a colorless, odorless, flexible, transparent, non-irritating and designed to enhance the healing process for open or closed wounds on sutures, staples, burns, abrasions, mass removals, lick granulomas and hot spots.

Its Benefit:

Allows the veterinarian or pet owner to monitor the healing process of the pet's wound without having to remove/change a wrap style bandage, even on those hard to bandage areas such as: tails, ears, joints, muzzle, wings, or fins.

Key Feature #3:

Water resistant, lick & chew resistant bandage replacement made of a non-toxic biodegradable hydrogel.

Its Benefit:

Allows the pet to go back into their natural environment without the worry of contamination or infection of the wound(s).

CHECK-OFF &
ECHO NOTES

First, always ask if a SutureSeal representative has been in contact recently:

Doctor, have you recently been introduced to SutureSeal Hydrogel wound sealant?

If **YES**, confirm and discuss benefits.

If **NO**, engage/detail the customer as the primary contact.

SutureSeal is a long lasting, transparent bandage replacement made of a non-toxic biodegradable hydrogel. This is a specially formulated hydrogel designed for incision and wound protection in small or large animals, Aquatic mammals, Exotic, Avian and Equine animals.

Confidence

I believe SutureSeal will provide an important tool for managing all open or closed wounds that you encounter with many of your patients. SutureSeal is applied in a liquid form and quickly transforms into a flexible gel that forms a protective layer that prevents dirt and debris from entering the wound and lasts for up to 14 days post application.

Neutral invitation

Let's take a look at some basic information about SutureSeal. It's colorless, odorless, flexible water resistant, non-irritating, and designed to enhance the healing process. The wound will heal, and the polymer will dissolve naturally after two weeks. You can use SutureSeal on any closed or open wounds including burns, cuts, scrapes, mass removals, spay/neuter, and paw pad injuries and especially on any hard to bandage areas like nose, tail, wings, etc.

It's the customer's decision

...so you can decide whether SutureSeal Hydrogel wound sealant is a solution you'll consider for your patients presenting with signs of all your open or closed wounds.
