

RESTORE BY NOXSANO

Nitric Oxide Accelerated Wound Healing

Key Feature #1:

Accelerates wound healing

Its Benefit:

- Clinically proven to drive **40% faster healing**
- Delivers a continuous supply of nitric oxide directly to the wound bed
- Promotes blood flow, angiogenesis, healthy granulation, and epithelialization

Key Feature #2:

Reduces workload and costs

Its Benefit:

- Longer change intervals and fewer office visits **saves time and money**
- Can be left in place up to 7 days
- No special equipment or training required

Key Feature #3:

Controls and prevents infection

Its Benefit:

- Provides **infection control** including resistant bacteria
- Remediates biofilms
- Reduces the need for broad spectrum antibiotics

RESTORE LINE OF WOUND CARE PRODUCTS

Multiple Forms for All Wounds on All Animals

Restore Wound Pads

Restore Pads deliver potent nitric oxide technology for fast wound healing and are ideal for all wounds, especially exudative wounds.

Restore Wound Gels

Restore Wound Gel delivers faster healing with the same potent wound healing nitric oxide technology in hydrogel form which can be applied directly to the wound bed. Restore Wound Gel is ideal for large wounds, complex geometries, or those in high-mobility areas.

NITRIC OXIDE

Activating The Body's Healing Process

The Restore Wound Product line utilizes proprietary technology to generate nitric oxide upon activation with water at point-of-use. Restore prevents infection, actively drives wound closure, and accelerates the healing process.

Nitric oxide, a small diatomic gas, is known to play a critical role in regulating the wound healing process. As a biological messenger, nitric oxide activates the inflammatory response, initiates wound disinfection, and stimulates angiogenesis and cell proliferation, all key phases of the wound healing cascade.

INFLAMMATION

When skin is broken, nitric oxide production increases at the site to act as a biocide and disinfecting agent to cleanse the wound.

PROLIFERATION

As healing progresses, nitric oxide acts as a biological messenger to stimulate angiogenesis and cell proliferation leading to granulation of the wound bed.

REMODELING

In the final phase of healing, nitric oxide signals the wound to reepithelialize and collagen to remodel the sub-dermal layers of skin.

CHECK-OFF & ECHO NOTES

First, always ask if a Noxsano representative has been in contact recently:

Doctor, have you recently been introduced to the Restore line of wound pads and gel?

If **YES**, confirm and discuss benefits.

If **NO**, engage/detail the customer as the primary contact.

Restore by Noxsano is a unique, clinically proven,* wound dressing that delivers nitric oxide directly to the wound bed over multiple days. Nitric oxide is naturally produced by the body as part of the wound healing cascade. By delivering nitric oxide topically, Restore pads and gels speed the normal wound healing process, prevent and remediate infection, and can even restart the healing process in stalled wounds. Restore provides advanced wound care level performance without high cost or requiring specialized training.

*Clinical studies completed at University of Georgia and Colorado State University.

Confidence

I believe Restore by Noxsano will provide an important tool for managing all types of wounds in your patients. This includes simple surgical wounds all the way through to significant trauma wounds and those healing by secondary intent. The healing benefits of nitric oxide are well known and studied in both human and animal wounds, and Restore is clinically proven to easily deliver the benefits of nitric oxide in the veterinary context.

Neutral invitation

Let's take a look at some basic information about Restore by Noxsano. It is available as both a gel and in two different sizes of wound pads. In both cases Restore is shipped ready to be easily activated by the addition of water or saline. Once activated the steady production of nitric oxide begins, and continues for up to seven days without changing the dressing.

It's the customer's decision

...so you can decide whether Restore is a solution you'll consider for your patients presenting with any type of open or closed wound, infected or not. You'll find this your new go-to wound dressing for hard to heal or traumatic wounds. Simple wounds and wounds healing by secondary intent will become a breeze to care for with Restore by Noxsano.
