Fast Detection

[Learn More](#)

Key Feature #1:

Fluvac Innovator[®] EHV 4/1 is the #1 most trusted equine respiratory vaccine.¹

Its Benefits:

Reliable, proven protection to help safeguard horses against equine influenza and herpesvirus.

- ✓ **Up to 4.7x stronger immune response** to equine influenza compared to large combination vaccines.*²
- ✓ **Metastim[®] adjuvant**, shown to support **cross protective immunity** against multiple influenza strains.³
- ✓ Pair with **Core EQ Innovator[®]** to offer comprehensive protection aligned with AAEP guidelines.
- ✓ Supported by the Equine Immunization Support Guarantee.

Key Feature #2:

Fluvac Innovator[®] has demonstrated protection against EIV in challenge studies and stimulates cross protective titers against emerging equine influenza strains.

Its Benefits:

Since 2018, Fluvac Innovator has been successfully evaluated against **116** equine influenza virus (EIV) strains isolated from **35** states, Canada and Europe.²⁻¹⁶

- ✓ Confirms **ongoing immunological relevance**, including activity against newly emerging North American clade 1 and European clade 2 strains.²⁻¹⁶
- ✓ Zoetis' commitment to continuous surveillance and antigenic relevance is a key reason Fluvac Innovator[®] remains the **most trusted equine respiratory vaccine**.¹

Key Feature #3:

Stablelab[®] enables stall side decision-making in just 10 minutes.

Its Benefits:

Use Stablelab to support quarantine and biosecurity decisions following potential exposure.

- ✓ Serum Amyloid A (SAA) is 30x more sensitive than a thermometer at detecting infection.¹⁷
- ✓ SAA has been shown to be a more accurate prognostic indicator of clinical status than traditional markers such as WBC, fibrinogen, or A:G ratio.^{19, 20}
- ✓ Helps differentiate infectious vs. non infectious conditions.¹⁸

sound CHECK-OFF & ECHO NOTES byte

First, always ask if a Zoetis representative has been in contact recently:

Doctor, are you currently discussing biosecurity tactics including proactive respiratory vaccination and stall-side diagnostics with your clients?

If **YES**, confirm and discuss benefits.

If **NO**, engage/detail the customer as the primary contact.

Confidence

Did you know that Fluvac Innovator EHV 4/1 is the most trusted equine respiratory vaccine in the industry.¹ By separating core and risk-based antigens, this vaccine has been shown to elicit a 4.7times greater immune response against equine influenza compared to large combination vaccines.²

Neutral invitation

I'd appreciate the opportunity to walk you through the latest research and clinical data on Fluvac Innovator EHV 4/1, and to explore another effective way to incorporate Stablelab into your practice for rapid detection during infectious disease or biosecurity concerns.

It's the customer's decision

...so you can determine whether recommending Fluvac Innovator EHV 4/1 and SAA testing with Stablelab aligns with the needs of your patients and clients.

*In a study, administering core and risk-based vaccines as separate injections provided up to 4.7 times higher influenza immune response than when given in combination.
